PROFILE

Full-Stack Developer with experience delivering large-scale enterprise web platforms and independently building modern, production-ready applications.

Currently contributing to a high-traffic institutional website built on C# ASP.NET MVC, React, Sitecore CMS, and Solr. Experienced in structured content architecture, component-driven development, API integrations, performance optimisation, and CI/CD workflows within collaborative agile teams.

Alongside enterprise development, I design and deploy modern full-stack applications using Next.js, TypeScript, and PostgreSQL-based backends, taking end-to-end ownership from system design and data modelling through to deployment and optimisation.

TECHNICAL SKILLS

Enterprise Architecture C# · ASP.NET MVC · Mobile App Development · Sitecore CMS · Solr · React · Sass	Modern Full-Stack Next.js · TypeScript · Node.js · PostgreSQL · Supabase · Tailwind CSS · Payload CMS · REST APIs	Tooling & Workflow Git · Jenkins · CI/CD · Jira · Confluence · Agile/Scrum · Component-driven architecture

PROFESSIONAL EXPERIENCE

Full-Stack Developer Leeds Beckett University	2022 – Present
Contribute to the development and evolution of a large-scale institutional website within a Sitecore CMS environment built on ASP.NET MVC and React.	
Develop and maintain modular Razor and React components within structured CMS architecture.	
Delivered a full institutional website rebrand, translating a new design system into scalable, production-ready components.	
Refactored legacy UI components to align with accessibility and performance standards.	
Designed and implemented a modern UCAS Tariff Calculator integrating the UCAS API, improving responsiveness and usability.	
Implemented a Safe Quick Exit feature for safeguarding pages, prioritising privacy-aware browser behaviour.	
Collaborate on mobile app evolution with the App Account Manager and third-party partners (feature scoping, UX improvements, releases).	
Work within agile delivery using Jira/Confluence and CI/CD workflows using Git and Jenkins.	

Founder - Lead Developer Tremayne Digital Solutions	2026 – Present
Design and build modern full-stack applications and selected client projects using Next.js, TypeScript, and PostgreSQL-based backends.	
Designed relational PostgreSQL schemas and structured data models for content-driven applications.	
Implemented dynamic routing systems with unique identifier generation and production-ready deployment flows.	
Integrated authentication, secure data handling, and cloud storage for media-heavy pages.	
Deployed and optimised applications via Vercel with performance and SEO considerations.	

SELECTED PROJECTS

Hathersage FC - hathersagefc.co.uk

Next.js · TypeScript · TailwindCSS

Designed and developed the official website for Hathersage FC, creating a modern grassroots football platform for fixtures, results, squad profiles, news, sponsors, events, and club information.

- Built a responsive, SEO-friendly website using Next.js, TypeScript, and Tailwind CSS.
- Developed reusable UI sections for fixtures, results, league tables, squad profiles, sponsors, news, events, and club content.
- Integrated automated Full-Time data syncing to keep fixtures, results, and league table information up to date.

Project Exit - projectexit.co.uk

Next.js · TypeScript · TailwindCSS

Developed the frontend marketing website and landing pages for a business exit platform focused on trust, clarity, and lead generation.

- Built responsive, high-performance frontend pages using Next.js, TypeScript, and Tailwind CSS.
- Developed reusable UI components and modular page structures for scalable content management.
- Optimised accessibility, responsiveness, and performance to deliver a polished conversion-focused user experience.

Heartfelt Pages - heartfeltpages.co.uk

Next.js · PostgreSQL

Full-stack digital platform generating dynamic personalised webpages.

- Designed PostgreSQL schema for structured content storage and media relationships.
- Implemented dynamic routing with unique page identifiers.
- Integrated secure form submission, authentication patterns, and storage workflows.
- Deployed via Vercel with performance optimisation.

Talent Finder (In Progress)

Data modelling · Search

Database-driven recruitment platform focused on scalable search architecture.

- Designing relational schema for filtering, indexing, and extensible candidate attributes.
- Planning modular API structure to support future expansion.

EDUCATION

MSc Computing Sheffield Hallam University	2021 – 2022
BSc Information Technology with Business Studies (First Class Honours) Sheffield Hallam University	2018 – 2021

EARLIER EXPERIENCE

Bar Manager — Kettle Black	2019 – 2022
Progressed to management; led daily operations, stock control, and team supervision.	
Production Engineer — Bibby Turboflex	2013 – 2018
Completed apprenticeship; oversaw manufacturing operations and reported to senior stakeholders.	

ADDITIONAL INFORMATION

Full UK Driving Licence.
